National AI Strategy – Second Edition 2025-2030

The National Council for Artificial Intelligence (NCAI) has unveiled the Second Edition of the National AI Strategy for 2025-2030. Its vision is to establish an inclusive AI framework that supports Digital Egypt, advancing social and economic development for the benefit of all Egyptians. The strategy also aims to build a national foundational model to drive industrial growth and foster regional and international cooperation, positioning Egypt as a leader in AI within Africa and the Arab region, while enhancing its role on the global stage. The mission derived from this vision focuses on developing a robust AI industry supported by strong governance, advanced technology, reliable data, modern infrastructure, a thriving ecosystem, and skilled talent. This approach ensures sustainability and competitiveness, aligning with Egypt's broader development goals.

National Cybersecurity Strategy 2023-2027

Jan 2024

The Egyptian Supreme Cybersecurity Council (ESCC) within the Egyptian Cabinet has crafted the National Cybersecurity Strategy 2023-2027. The strategy's core objective is to address the increasing cyber threats emerging from diverse sources. Simultaneously, it aims to cultivate human capital and establish a robust national industry, positioned to make substantial contributions to Egypt's GDP.

Egypt National Artificial Intelligence Strategy

Jul 2021

Egypt has launched the National Artificial Intelligence (AI) Strategy to exploit such technology to attain the country's sustainable development goals, play a key role in facilitating regional cooperation within the African and Arab regions, and establish Egypt as an active international player in AI. This is within the framework of Egypt's keenness to embrace the digital era, as advancements in technology continue to evolve every day.

National Cybersecurity Strategy

Dec 2018

The Egyptian Supreme Cybersecurity Council (ESCC)— reporting to the Cabinet of Ministers, and chaired by the Minister of Communications and Information Technology— has launched the National Cybersecurity Strategy (2017-2021), aiming to provide a safe and secure environment that would enable various sectors to deliver integrated e-services, in line with the State's efforts to support national security and develop the Egyptian society.

e-Commerce Strategy

Mar 2018

The National e-Commerce Strategy was launched in December 2017, in cooperation with the United Nations Conference on Trade and Development (UNCTAD), the main partner in the preparation of the National e-Commerce Strategy for Egypt. It entails a set of recommendations that support decision-making policies in key aspects of e-commerce and contribute to overcoming the challenges facing e-commerce in Egypt.

Digital Arabic Content National Strategy

Nov 2014

The vision of the Digital Arabic Content National Strategy seeks to create an innovative digital Arabic content that preserves the Egyptian identity, maintaining sustainable development and the shift towards a knowledge economy. This is achieved through empowering and promoting the Arabic digital content to connect with different civilizations and cultures in light of the challenges of the globalization era.

National FOSS Strategy

Nov 2014

Boosting the establishment of a well-developed open source software ecosystem, the National Free and Open Source Software (FOSS) Strategy addresses Egypt's challenges in relation with the market uptake, awareness, education and business know-how for FOSS start-up companies. FOSS Strategy unleashes the innovative potential of young people and encourages a transformative and empowering ICT industry.

Social Responsibility Strategy

Nov 2014

MCIT has developed a social responsibility strategy for Egypt ICT sector as a guideline that aims to maximize benefits of projects and regulate existing and future discussions with ICT concerned bodies to avoid duplication of projects and disseminate good practices, thereby maximizing societal benefits.

EG-Cloud Strategy

Nov 2014

The Egyptian Government Cloud (EG-Cloud) Strategy seeks to improve the efficiency and performance of the government. It enables the delivery of optimum value by increasing operational efficiency and responding faster to integral needs. The cloud model supports governmental agencies grappling with the need to provide highly rapid reliable and innovative services despite resource constraints.
